Aayush Goel

AI Engineer (LLMs — RAG — Agentic Workflows — Full-Stack)
+91-8533908593 | mgoel1296@gmail.com | linkedin.com/in/aayush-goel | github.com/goel-aayush
Ghaziabad, India | Portfolio | LeetCode

Summary

AI Engineer with hands-on experience in **LangChain, LangGraph, RAG pipelines, and agentic workflows**. Proficient in **Python, FastAPI, and ChromaDB**, with exposure to **LLM APIs** (Groq, OpenAI, Anthropic Claude) and **prompt engineering**. Experienced with AI dev tools including **GitHub Copilot, Cursor, and Claude Code**.

Education

ABES Engineering College — Ghaziabad, India
B.Tech in Computer Science — CGPA: 7.0/10 — *Nov 2022 – Jul 2026*

Experience

Full Stack Developer Intern — Jun 2025 – Present
ADMV Consultancy Services — *Remote*

- Spearheaded development of a scalable, responsive **CRM dashboard** using **Next.js**, **React**, and **Tailwind CSS**, serving **10k+ daily active users**.
- Architected secure **role-based access control** and session management using **JWT**, improving multi-tenant system security.
- Integrated **RESTful APIs** with async workflows enabling real-time data rendering and automation of business processes.
- Practiced **vibe coding** using **GitHub Copilot, Cursor, and Claude Code** to accelerate development cycles, debugging, and code optimization.
- Optimized frontend performance and backend response handling, improving overall system efficiency and user experience.

Projects

Intelligent Document Q&A Pipeline | *Python, LangChain, LangGraph, ChromaDB, Groq LLM* — GitHub

- Built an end-to-end **RAG system** for semantic document querying with **sub-second latency** using **LangGraph** to orchestrate multi-step agentic retrieval workflows.
- Designed an **embedding pipeline** using **SentenceTransformer** and **ChromaDB** for scalable vector storage and **semantic search**.
- Integrated **LLM APIs (Groq)** for context-aware, citation-grounded responses; applied **prompt engineering** strategies to optimize output quality.

AI Evaluator Platform (EdTech AI) | *FastAPI, LangChain, ChromaDB, Google Vision OCR* — GitHub

- Reduced manual grading effort by automating evaluation of handwritten responses using **OCR** and **LLMs**, exposing pipeline via **FastAPI** services.
- Built a **RAG-based agentic workflow** leveraging **ChromaDB** vector retrieval for contextual grading and structured feedback generation.
- Applied **prompt engineering** and **tool/function calling** patterns to guide LLM output into structured, rubric-aligned evaluation reports.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript

AI & ML: LangChain, LangGraph, RAG Pipelines, LLM Architectures, Agentic Workflows, Prompt Engineering, Tool/Function Calling, Semantic Search, Embeddings

LLM APIs: Groq, OpenAI, Anthropic Claude, Gemini

Vector Databases: ChromaDB, Pinecone (familiar), Weaviate (familiar)

AI-Assisted Development: GitHub Copilot, Cursor, Claude Code, ChatGPT

Backend: FastAPI, Flask, Node.js, Express, RESTful APIs

Frontend: React, Next.js, Tailwind CSS, Material UI

Databases: MongoDB, MySQL, PostgreSQL, ChromaDB

Tools & DevOps: Docker, Git, GitHub, Vercel

Achievements & Recognition

Hackathon Finalist — Top 5 of 120 Teams
*Built a Real-Time Trading Insights agent using **Model Context Protocol (MCP)**, integrating live data streams with an LLM-powered*
