ANSHIKA ARYA

AI Engineer | LLMs, RAG & Generative AI
+91-8076270498 | anshikaarya042@gmail.com | LinkedIn | GitHub | Portfolio | Noida, India

Summary

AI/ML Engineer with 1+ year of experience building LLM-powered applications, RAG systems, and end-to-end machine learning pipelines using Python, LangChain, and TensorFlow. Skilled in NLP, model development, model deployment, and scalable AI systems using REST APIs and vector databases (FAISS, Pinecone).

Technical Skills

- **Core:** Python, SQL, PostgreSQL
- **Machine & Deep Learning:** TensorFlow, PyTorch, Scikit-Learn, Keras
- **LLM & GenAI:** LangChain, RAG, Prompt Engineering, Vector Databases
- **Computer Vision:** OpenCV, YOLO, MediaPipe
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **Tools:** Git, Jupyter, Selenium, BeautifulSoup, Docker
- **Backend:** Flask, REST APIs, Model Deployment

Experience

AI/ML Engineer Jan 2025 – Present
Tamar Software *Noida, UP*

- Developed and deployed LLM-based and ML applications for NLP and agentic workflows, improving automation efficiency by 30% and reducing manual effort.
- Built and optimized end-to-end ML pipelines, handling datasets of 10K+ records, improving model performance and inference efficiency.
- Performed EDA and model evaluation using Pandas, NumPy, Seaborn, and Matplotlib; followed Git-based collaborative workflows.
- Designed and developed scalable REST APIs using Flask, reducing manual processing time by 30% and enabling efficient AI application deployment.

Projects

Infant Behavior Analysis System | *Python, OpenCV, TensorFlow, MediaPipe*

- Developed a multi-modal emotion and real-time pose detection system achieving 76% accuracy using Python, OpenCV, and TensorFlow.
- Implemented facial emotion recognition and pose estimation, integrating early fusion for robust predictions.
- Deployed the system using Flask to provide actionable insights, detecting infant states such as hunger, discomfort, and sleepiness.

Telemedicine Virtual Agent | *Flask, LLMs, PostgreSQL, LangChain*

- Developed a multi-modal AI system enabling diagnosis via text, voice, and images using LangChain and ML models.
- Integrated speech and image-based detection using SpeechRecognition and Roboflow models.
- Built a PostgreSQL-backed system for patient history, improving scalability and real-time interaction.

Web Automation & Scraping Tool | *Python, Selenium, BeautifulSoup*

- Built an automation tool to scrape multi-page and login-protected websites, enabling automated navigation and file downloads.
- Automated login handling and dynamic page navigation using Selenium, with data extraction via BeautifulSoup.
- Handled dynamic content, pagination, retries, ensuring reliable automation workflows.

Education

Amity University Noida, Uttar Pradesh
Bachelor of Computer Applications *2023 – 2026*

KMGGP College Greater Noida, Uttar Pradesh
Diploma in Computer Science and Engineering *2019 – 2022*
