Naman Gupta

namangupta397@gmail.com — +91 7905729644 — LinkedIn — GitHub

Professional Summary

Data Analyst with strong expertise in Python, SQL, and data-driven workflows. Experienced in data preprocessing, exploratory data analysis (EDA), and building data pipelines and dashboards. Skilled in data validation, automation, KPI tracking, ETL workflows, and supporting business insights through reporting and visualization.

Technical Skills

- **Programming:** Python (Pandas, NumPy, Matplotlib), SQL, TensorFlow
- **Machine Learning:** Regression, Classification, Clustering, Feature Engineering, Model Evaluation
- **Deep Learning:** PyTorch, CNN, Neural Networks
- **Data Analysis:** Data Cleaning, EDA, Data Transformation, Trend Analysis, Data Validation, Data Wrangling
- **Visualization:** Power BI, Tableau, Excel Dashboards
- **Statistics:** Hypothesis Testing, Correlation Analysis, Statistical Modeling
- **Tools:** Git, Jupyter Notebook, Google Colab, VS Code, GitHub
- **Concepts:** Data Pipelines, GenAI, Automation, KPI Tracking, ETL, RAG, LLM

Experience

Research Intern — Council of Scientific and Industrial Research (CSIR) June 2025 – July 2025
Bengaluru, India

- Collected, cleaned, and analyzed datasets using Python (Pandas, NumPy) and SQL.
- Performed exploratory data analysis and validation to ensure data quality and consistency.
- Developed LSTM-based time-series forecasting model for predictive analytics tasks.
- Evaluated model performance using MAE, RMSE, and R^2 metrics for validation.
- Built Power BI dashboards and reports to track KPIs and support data-driven insights.

Projects

LLM-Based Compliance Data Extraction Pipeline GitHub Python, NLP, LLM

- Developed an LLM-powered pipeline using OpenAI APIs and LangChain to extract structured data from compliance documents (ISO 27001, HIPAA) across 5,000+ records.
- Implemented control mapping using TF-IDF embeddings and similarity scoring improving accuracy by 30%.
- Processed datasets into structured formats (CSV/Excel) supporting data workflows, reporting, and analysis.

Graph-Theoretic Anomaly Detection in Financial Transaction Networks GitHub Python, Network Analysis

- Built graph-based anomaly detection model on financial transaction datasets (20,000+ records) to identify fraud patterns.
- Applied centrality measures and community detection to detect anomalous behavior improving precision by 25%.
- Improved detection performance using graph-based features and statistical analysis techniques.

E-Commerce Sales Performance Analytics GitHub Power BI, SQL

- Built Power BI dashboard analyzing sales trends, revenue growth, and customer behavior across 50,000+ transactions.
- Designed data model and implemented DAX measures for KPI tracking and performance analysis.
- Performed SQL-based data extraction and transformation to support reporting, dashboards, and business insights.

Education

B.Tech — Computer Science Engineering (AI & ML) Aug 2022 – May 2026
SRM Institute of Science and Technology, Chennai
CGPA: 7.9 / 10

Certifications/Publications

McKinsey Forward Program 2026 (ongoing) — McKinsey & Company
Certificate of Participation – ICAME 2026, AITS Tirupati and AIP Publishing
Data Analytics with Python — NPTEL
