MOHD ASHHAR SIDDIQUI

Contact No: +91 9718833450
Email: amatiq6@gmail.com
LinkedIn: https://www.linkedin.com/in/mohd-ashhar-siddiqui/

PROFESSIONAL SUMMARY

Aspiring AI Engineer with strong foundation in Python, Data Analysis and Machine Learning concepts. Hand-on experience in working with dataset, building analytical pipeline, and exploring AI/ML workflows. Highly motivated to work on LLM, rag system, and AI agent while continuously learning modern AI tools like LangChain.

PROFESSIONAL EXPERIENCE

Jr. Data Analyst **Oct '23 — Jul '24**
Nextcore Business Technologies Pvt.Ltd. New Delhi, India

- Conducted financial analysis on **20+ market datasets**, identifying investment opportunities that supported **data-driven portfolio decisions**.
- Cleaned and analyzed **50K+ records** using Python (Pandas, NumPy), performing EDA to uncover trends in financial and EdTech datasets.
- Collaborated with product and strategy teams to recommend **data-backed solutions**, helping refine investment strategies and product roadmaps.
- Wrote optimized SQL queries handling **large financial datasets**, improving data retrieval speed by **30%** for reporting workflows.

ACADEMICS

B. Tech | Artificial Intelligence and Data Science *July 2025*
Galgotias University *6.54 CGPA*

Diploma | Computer Science and Engineering August 2022
Galgotias University | *Knowledge Park* *78%*

High School May 2016
NIOS *67%*

SKILLS

- **Programming Languages:** Python
- **SQL:** Joins, Subqueries, Aggregations, CTEs, Data Extraction
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning
- **BI & Reporting:** Power BI Dashboards, Excel Reporting, EDA
- **Analytics:** Trend Analysis, Business Insights, Data Validation, Data Preprocessing
- **Tools:** Advance MS Excel, Power BI, GitHub
- **Soft Skills:** Communication, Presentation

CERTIFICATIONS

- Data Analytics – Coursera (April 2025)

PROJECT

Zudio Retail Business Analysis GitHub Link

- Analyzed 100K+ retail transaction records to identify top-performing SKUs, seasonal demand patterns, and revenue leakage.
- Built EDA pipeline with automated visualizations, reducing insight generation time by 60%
- Delivered actionable recommendations for inventory optimization and regional expansion strategy.
- Technology Used: Python, Pandas, Advanced SQL

iPhone Sales Analysis (Link)

- Analyzed **10K+ iPhone sales records** using Python to identify regional demand patterns and pricing trends.
- Built visual dashboards highlighting **top-performing markets**, supporting business expansion insights.
- Technology Used: Python, Pandas, Matplotlib, Seaborn.

COVID-19 Analysis (Link)

- Collected and cleaned real-world COVID-19 datasets to ensure accuracy.
- Conducted time-series analyses to observe infection trends across countries.
- Calculated maximum infection rates per country and compared growth patterns.
- Built clear, insightful visualizations (line charts, bar graphs, heatmaps) to facilitate interpretation.
- Derived actionable insights, such as identifying the most affected regions and key growth phases.
- Skills Demonstrated: Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering & Aggregation, Data Visualization & Storytelling, Problem-solving and analytical thinking

ACHIEVEMENTS

- Served as Class Representative during 3rd year of B.Tech, demonstrating strong leadership, communication, and coordination skills.
- Delivered analytics insights used in real investment evaluation workflows.
